CBC - CODE BREAKER CHALLENGE 2.0

Objectives, Outcomes, CO-PO-PSO, SDG Mapping

Objectives:

1. Promote AI-Driven Innovation - Encourage students to design and build real-world solutions using AI, Machine Learning, and Cybersecurity.
2. Foster Hands-on Technical & Design Skills - Guide teams through structured Design and Implementation rounds covering UI/UX, architecture, and coding.
3. Bridge Industry-Academia Gap - Expose students to industry-level evaluation on innovation, feasibility, scalability, and technical quality.
4. Identify & Reward Top Talent - Recognize outstanding teams through a structured, merit-based judging process across all rounds.

Outcomes:

1. Participants deliver functional working prototypes solving real-world problem statements within the 24-hour hackathon window.
2. Participants gain improved technical, design-thinking, and rapid-prototyping skills, along with confidence in live presentation and Q&A.
3. Participants receive direct industry-style feedback from judges, gaining insight into real-world product and engineering standards.
4. Winning teams receive cash prizes (Rs. 60,000+ pool) and career opportunities:
 - 1st Place – Placement opportunity
 - 2nd Place – Internship opportunity
 - 3rd Place – Internship opportunity

CO-PO MAPPING:

CO	PO-1	PO-2	PO-3	PO-4	PO-5	PO-6	PO-7	PO-8	PO-9	PO-10	PO-11	PO-12	PSO-1	PSO-2
CO1	3		3										2	3
CO2	2		2						2				3	2
CO3									2	3				
CO4									3		3			

3 - High, 2 - Medium, 1 - Low, and Blank - No Correlation

**Objectives, Outcomes, CO-PO-PSO,
SDG Mapping**

Date: 07-09-2026

PROGRAM OUTCOMES (POs):

PO 1: Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO 2: Problem Analysis: Identify, formulate, review relevant literature, and analyze complex engineering problems reaching substantiated conclusions and principles of mathematics, natural sciences, and engineering sciences.

PO 3: Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO 4: Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments analysis & interpretation of data, and synthesis of the information to provide valid conclusions.

PO 5: Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling understanding of the limitations. complex engineering activities with an

PO 6: The Engineer and Society: Apply reasoning Informed by the contextual knowledge to assess societal health, safety, legal & cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO 7: Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO 8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO 9: Individual and Team Work: Function effectively as an individual, and member or leader in diverse teams, and in multidisciplinary settings.

PO 10: Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO 11: Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO 12: Life-Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs):

PSO 1: Graduates will be Proficient in programming and problem-solving skills for developing, managing software and distributed systems.

PSO 2: Graduates will be able to identify, formulate, predict and solve real world problems by applying principles of Artificial Intelligence & Machine learning.

SDG MAPPING

SDG No.	SDG Title	CO1	CO2	CO3	CO4
1	No Poverty				
2	Zero Hunger				
3	Good Health and Well-being	3	2		3
4	Quality Education				
5	Gender Equality				
6	Clean Water and Sanitation				
7	Affordable and Clean Energy				
8	Decent Work and Economic Growth				
9	Industry, Innovation, and Infrastructure	3	3	2	3
10	Reduced Inequalities				
11	Sustainable Cities and Communities				
12	Responsible Consumption and Production				
13	Climate Action				
14	Life Below Water				
15	Life on Land				
16	Peace, Justice and Strong Institutions				
17	Partnerships for the Goals			2	2

3 - High, 2 - Medium, 1 - Low, and Blank - No Correlation
